1. The alleged V-1 and V-2 rocket launching sites reported earlier as located near Split have since been visited by trained observers, who report that nothing was seen which would indicate that a military installation was in evidence. No barbed wire enclosure was seen. The alleged sites were observed from a nearby railroad as well as from a road which extends from Stafilic and passes to the west of Kastel Stari station.
 2. The observers do not consider this as complete proof, however, that the sites do not exist owing to the contours of the hillside which make part of the area impossible to see.
